Dear Management Team:

This letter is to advise you that LCEC technicians will be working in your community in the upcoming months, removing the LCEC load management devices at individual homes. Load management equipment is located on the outside of the home near the air conditioner and possibly at the water heater accessible from the outside of the home or inside the home. The home owners are being notified in advance and are asked to make an appointment to schedule this work with our technicians.

For the security of your residents, our customers, we wish to assure you these technicians will be LCEC employees, will be in marked LCEC vehicles, and will have LCEC identification badges.

We hope this advance notification will enable you to answer any questions you may receive from your residents. We appreciate your support of LCEC's maintenance program.

Sincerely,

Doug Barker
Supervisor, Energy Services
